☎ +91 9904416292

Summary

Aspiring Data Analyst and Data Scientist with hands-on experience in data analysis, machine learning, and data-driven projects. Strong problem-solving mindset with a focus on transforming data into meaningful insights and practical solutions.

Skills

Programming & Querying: Python, SQL

Tools & Platforms: Advanced MS Excel, Power BI, Jupyter Notebook, Git, GitHub

Analytical Abilities: Pandas, NumPy, Data Cleaning, Data Preprocessing, EDA

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Scikit-learn

Databases: MySQL, MongoDB

Experience

Web Developer - Internship

Jun 2024 – Jul 2024

IT Hub Software

Bhavnagar

- developed responsive websites using **HTML**, **CSS**, and **JavaScript**, with backend and database integration.
- Ensured cross-browser compatibility and optimized websites for mobile devices.

Android Developer - Internship

Jun 2025 – Jul 2025

Kryosync

Bhavnagar

- Designed user interfaces and implemented core features using **Java**, **XML**, and Android Studio, integrating **REST APIs** for dynamic content.
- Identified and resolved bugs to improve application performance, stability, and user experience.

Projects

Krishna Chatbot | *HTML, CSS, JavaScript, Botpress*

[GitHub](#) — [Live](#)

- Developed a responsive web-based devotional chatbot focused on Krishna-related conversations using **Botpress**.
- Designed a lightweight and accessible interface using **HTML**, **CSS**, and **JavaScript**.
- Integrated and deployed the chatbot as a static web application using **GitHub Pages**.

Credit Card Fraud Detection | *Python, Scikit-Learn, Pandas, Flask, Tailwind CSS*

[GitHub](#) — [Live](#)

- Developed an end-to-end machine learning application to classify financial transactions as fraudulent or legitimate.
- Compared multiple classification models and applied cross-validation and hyperparameter tuning using **RandomizedSearchCV**.
- Achieved **82.69% ROC-AUC** and deployed the final Logistic Regression model using **Flask** with a responsive web interface.

Heart Disease Prediction System | *Python, Scikit-Learn, Pandas, Streamlit*

[GitHub](#) — [Live](#)

- Developed a machine learning system to predict heart disease using patient health and clinical data.
- Performed data cleaning, EDA, duplicate removal, feature encoding, and feature scaling to prepare the dataset.
- Compared Logistic Regression, KNN, Decision Tree, and SVM models, achieving **82% accuracy**, and deployed the application using **Streamlit**.

Certifications

Foundations of AI | *Microsoft Edunet*

[Certificate](#)

Data Structures and Algorithms using Java | *NPTEL, IIT Kharagpur*

[Certificate](#)

AI Agent Making Competition Winner | *AzzipTech*

[Certificate](#)

Digital Marketing | *WsCube Tech*

[Certificate](#)

Education

B.Tech - Computer Science Engineering

Expected: July 2027

Gyanmanjari Innovative University, Bhavnagar

CGPA: 7.58 / 10
